

UGC CARE Publications

India's official quality-approved journal listing for academic research

136

UGC CARE Publications refers to research published in journals listed under India's UGC-CARE (Consortium for Academic and Research Ethics) reference list, established to ensure quality and prevent predatory publishing in Indian academia.

DEFINITION

Research articles published in journals included in the UGC-CARE list, maintained by India's University Grants Commission to ensure academic publishing quality and integrity.

WHY IT MATTERS

UGC-CARE listing is mandatory for many Indian academic requirements, including PhD submission and faculty promotion, making it central to research careers within India's higher education system.

WORKING PRINCIPLE

QUICK FACTS

- UGC-CARE was established in 2019 to combat predatory publishing in India
- The list is periodically reviewed and updated by the UGC-CARE consortium
- UGC-CARE compliance is now a standard requirement across most Indian universities

KEY TERMS

- CARE list
- Predatory journal
- UGC compliance
- Journal vetting
- Academic integrity

CORE CONCEPTS

- CARE list categories
- Predatory journal screening
- Journal quality vetting
- UGC compliance requirements

APPLICATIONS

- PhD thesis publication requirements in India
- Faculty promotion criteria at Indian universities
- Research grant eligibility
- Institutional accreditation metrics

REAL-LIFE EXAMPLES

- An Indian PhD candidate confirming their target journal is UGC-CARE listed before submission
- A university's faculty promotion policy requiring UGC-CARE publications
- NAAC accreditation assessments referencing UGC-CARE output

ADVANTAGES

- Helps researchers avoid predatory or fraudulent journals
- Directly recognized by Indian academic institutions
- Improves overall research publishing standards in India

LIMITATIONS

- List primarily relevant within India, less recognized internationally
- Journals can be added or removed, requiring researchers to stay updated
- Some legitimate niche journals may not yet be listed

CAREER OPPORTUNITIES

Academic researcher in India, University research administrator, Journal quality reviewer, Research compliance officer

INDUSTRY APPLICATIONS

Indian universities and colleges, Government research funding bodies, Academic publishing houses in India, Higher education regulatory bodies

RESEARCH AREAS

Publication ethics in India, Predatory journal detection, Research quality assurance, Academic policy research

FUTURE SCOPE

Continued refinement of the CARE list criteria is expected to further strengthen research integrity standards across Indian higher education.

CURRENT TRENDS

Ongoing updates to the CARE list to remove non-compliant journals and add newly qualifying ones as publishing standards evolve.

SUMMARY

UGC CARE publications appear in India's officially vetted journal list, created to protect researchers from predatory publishing and maintain academic quality across Indian higher education.
