

Entrepreneurship

Turning ideas into viable businesses

099

Entrepreneurship is the process of designing, launching, and running a new business, typically starting as a small enterprise, while bearing the associated risks to bring an innovative idea to market.

● DEFINITION

The activity of setting up and running a business, taking on financial risk in pursuit of an innovative product, service, or business model.

● WHY IT MATTERS

Entrepreneurs drive economic growth, job creation, and innovation, often introducing products and services that transform industries and daily life.

● WORKING PRINCIPLE

INPUT / PROBLEM

CORE PROCESS

OUTCOME / APPLICATION

Entrepreneurs identify unmet market needs, develop and test solutions, and build organizations to deliver those solutions at scale, iterating based on customer feedback and market response.
